

# CODEKSHETRA HACKATHON

## Round 1: Idea Proposal Document

Track: Software Edition Only

### Team Information

| No. | Member Name | Institute Name | Role        |
|-----|-------------|----------------|-------------|
| 1   |             |                | Team Leader |
| 2   |             |                |             |
| 3   |             |                |             |
| 4   |             |                |             |

**Team Size Requirement:** Minimum 2 and Maximum 4 Members.

**Team Name:** \_\_\_\_\_

**Project Name:** \_\_\_\_\_

**Selected Theme:** \_\_\_\_\_

## **1.Abstract**

Provide a concise summary of your proposed solution. This section should clearly explain the problem, proposed approach, and expected impact (150–250 words recommended).

## **2.ProblemStatement**

Clearly define the real-world problem being addressed.

## **3.MarketAnalysis-ProsandCons**

Describe your project's market analysis

## **4.TargetUsers**

Describe customers and end-users.

## **5.ExistingSolutions**

List available solutions in the market.

## **6.CompetitiveAdvantage**

Explain how your solution is better and innovative.

## **7.MarketImpact**

Describe potential impact and scalability.

## **8.ProposedSolution**

Explain system architecture, working methodology, and implementation approach.

## 9. Technology Stack

| Component          | Technology Used |
|--------------------|-----------------|
| Frontend           |                 |
| Backend            |                 |
| Database           |                 |
| Cloud / Deployment |                 |
| Other Tools / APIs |                 |

### Innovativeness

- Unique technical contributions
- Advanced features
- Differentiation factors

### Show Stoppers and Risk Analysis

- Technical risks
- Regulatory or compliance risks
- Scalability challenges
- Future uncertainties

### Prototype / Wireframes

Include screenshots or provide demo link.
